THROUGH the encouragement offered us by the Architects and Trade and the rapidly increasing demand of our several manufactured productions, shown herewith, we have been influenced to illustrate a most complete assortment of all classes of ornamental decorations, that can easily and practically be applied successfully for correct effects.

We have spared no efforts nor time to get our goods to the highest standard in material and execution, which together with our thoroughly practical knowledge has made our success. It shall be our effort to maintain the standard and meet the requirement of times, and we feel satisfied of the increased patronage of those desiring the best.

Our main effort is to satisfy and execute what is wanted, and if we do not show what proceedly may be required, we will gladly accept any suggestions and execute them exactly in accordance with particular requirement.

ARCHITECTURAL DECORATING COMPANY.

Materials

Our materials have all been thoroughly tested and through careful experiments we have overcome the general imperfections and defects and can unhesitatingly claim that we have the best and most durable on the market. Our productions consist of the following four materials:

Exterior composition.
Portland cement.
Fibrous plaster in connection with interior plaster finish.
Composition carvings in connection with wood work.

Exterior Composition

The only material known and warranted to stand any climatic changes besides stone and terra cotta. It is used for porch capitals, brackets, gable ornaments, mouldings, etc. This material can easily be applied by any carpenter or capable mechanic by nailing or screwing same in place. It should always be well painted like exterior woodwork. If specified we would furnish sheet metal covers on projection of abacus of capitals to drain all moisture from connecting wood work.

Genuine Portland Cement

The nature of Portland cement is well known to everybody and needs no comment. It is the only indestructable material for column bases, porch railings, vases, etc. Endless complaints on wood bases are overcome by its use at a low percentage over the cost of wood.

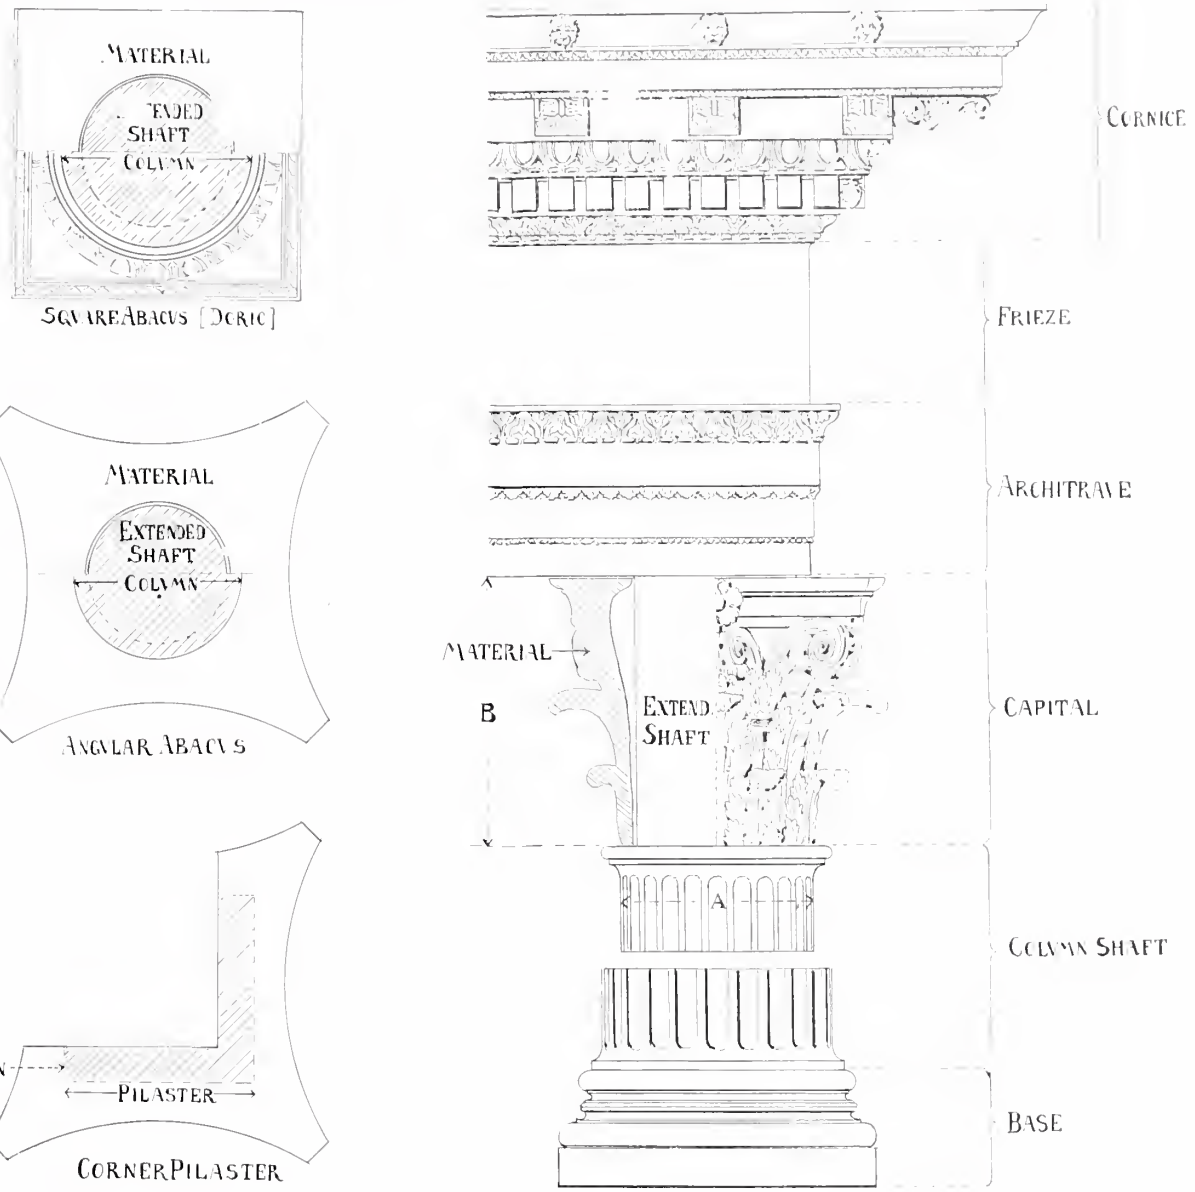
Fibrous Plaster

Used in connection with plaster finish for the interior decorations of public buildings, residences, theaters and churches as cornices, coves, mantel panels, wall panels, arches, beams and ceiling decorations. This staff work should be nailed or screwed in position. Thin and delicate ornaments should be applied with paper hanger's paste and nailed with thin wire nails. This rye flower paste can be made stronger by adding venetian turpentine and boiled dextrine.

The ceiling decorations, etc., as illustrated, we keep in stock and can be shipped from four to eight days after receipt of order.

Composition Carvings

In connection with interior wood finish is especially adapted to take the place of hand carving on account of its great ability to imitate any kind of natural wood in respect to color and grain and its exceedingly low cost. It is superior to any material for enameling or gilding; also to decorate canvassed ceilings or walls, as shown on various illustrations. These ornaments are shipped in a soft condition and can be kept pliable by moistening the outside wrapper. When applied to wood work, the wood should not be painted or stained. The ornaments should be glued in place and if they are heavy also nailed in addition.



INSTRUCTIONS.

In ordering column capitals, state exact size of diameter at neck as indicated by letter "A." Height of capital as indicated by letter "B."

In ordering pilaster capitals, state exact width of pilaster at neck, height of pilaster at neck and return of pilaster at neck.

SIZE OF EXTENDED SHAFT OR CORE.

For a	6″	cap	the	extended	shaft	will	be	4″	diameter
"	" 7″	"	"	"	"	"	"	5″	"

"	" 9″	"	"	"	"	"	"	7″	"
"	" 10″	"	"	"	"	"	"	8″	"
"	" 11″	"	"	"	"	"	"	8½″	"
"	" 12″	"	"	"	"	"	"	9½″	"
"	" 13″	"	"	"	"	"	"	10¼″	"
"	" 14″	"	"	"	"	"	"	11¼″	"
"	" 15″	"	"	"	"	"	"	12″	"
"	" 16″	"	"	"	"	"	"	13″	"
"	" 18″	"	"	"	"	"	"	14¾″	"
"	" 20″	"	"	"	"	"	"	16½″	"
"	" 22″	"	"	"	"	"	"	18¼″	"
"	" 24″	"	"	"	"	"	"	20″	"
"	" 30″	"	"	"	"	"	"	25″	"

The extended shaft must be a trifle longer so that the concentrated weight will rest on shaft and not on capital.

The interior caps have a solid wood foundation and require no core on column, but are fastened to column or pilaster like a hand carved cap.

In ordering interior caps, state kind of wood, viz.: Oak, Birch, Mahogany, etc., or whether for painted work. State exact return or thickness of pilaster.

All capitals listed under the heading "Exterior" can also be furnished for interior plaster finish.

The prices on pilaster capitals are based on half square capitals only. Capitals over half or full square will be same price as corresponding column capitals.

Above Prices Subject to Discount.

*Same design as No. 2745, with plain wood mouldings for top and bottom.

These Coves are made in fibrous plaster and are furnished in lengths of from 4 to 5 feet.

This cut shows the section of a Cove in its position to ceiling and wall. The mouldings on top and bottom are plain wood mouldings, which we will furnish with every Cove, where no other mouldings are shown on illustrations.

The thickness of the material is ½ inch.

Coves should be fastened to wall and ceiling with nails or screws, as illustrated on cut.

The mouldings will cover the horizontal joints on top and bottom, while the vertical joints must be pointed up with fine plaster of paris.

Wherever Coves go on a curved surface, exact radius should be given.
